

You are attending a multilingual event  
**Linguali is the mobile application that will  
allow you to listen to the interpreter's  
simultaneous translation**

[bit.ly/LINGUALIEVENT](https://bit.ly/LINGUALIEVENT)

*Before the Event*

Install the Linguali app on your smartphone

Watch the demo video [bit.ly/lingualieventdemo\\_EN](https://bit.ly/lingualieventdemo_EN)

Don't forget to bring on your earphones or headphones

And to have your mobile fully charged!

*At the Event*

Wi-Fi :

1

Install Linguali on your mobile device (if not done yet)  
You need internet access (3G-4G or Wi-Fi)

2

Connect your mobile to the Event's Wi-Fi network  
(ask the organiser)

3

Launch the Linguali app

4

The choice of available languages is displayed  
(if not, the Interpreter may not be ready ; just wait and try again from time to time)

5

Choose your language and... listen

The app is installed, your mobile is connected to the event's Wi-Fi; but, **either the event is not displayed, or the event is displayed but you can't choose a language or listen to the interpreter...**

**In most situations, the issue is solved by doing the following:**

- 1 Quit all open applications on your mobile;
- 2 Restart your mobile;
- 3 Set your mobile to flight safe
- 4 Then open the Wi-Fi and select the Event's Wi-Fi  
(yes, Wi-Fi works in flight safe mode)
- 5 Finally, launch Linguali again

***Forgotten your password to the App Store?***

***Not enough free storage on your mobile?***

***Not supported OS version?***

There is nothing to do but either get an earphone splitter, to share your neighbour's phone, or borrow a device.
